

Setup Parachat on your iPhone

Follow these instructions to setup the Parachat application (available from the iTunes store) for your iPhone, iPod Touch or iPad. Note the application currently is made for the iPhone so it is just a upsized on the iPad. Parachat works via 3G or Wi-Fi networks.

Download and Launch the Parachat Application	Parachat on your iPhone
<p>Parachat is a free download from the iTunes store</p>	

First Run	Parachat on your iPhone
<p>The initial launch of Parachat on the iPhone you will be greeted with this message.</p>	

Settings Access	Parachat on your iPhone
<p>This is the screen that you will see after clicking "OK".</p> <p>Note the Settings in the lower right hand corner. Press the Settings.</p>	

Settings Screen	Parachat on your iPhone
<p>In the Settings Screen you have Preferences...</p> <p>Server Selection...</p> <p>And other ancillary buttons.</p>	

Preferences...

Click on Preferences.

In the Preferences screen enter the following information:

Site Name: 12118

Room Name: Lobby*

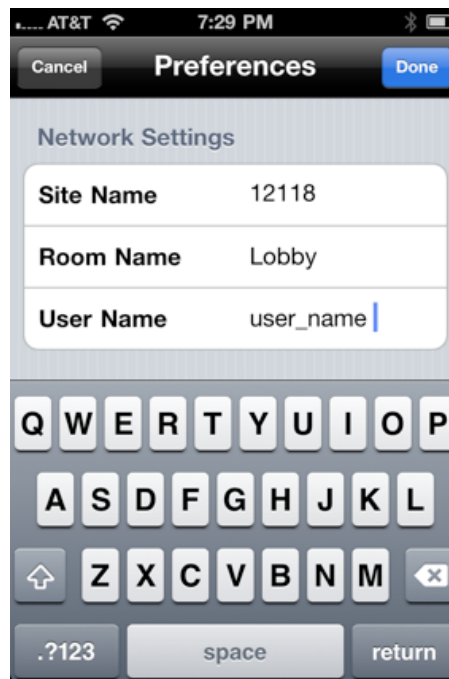

User Name: (whatever you want to be identified by)

Then Click the Done Button.

Note: If you want to go to another room, you need to be logged into the server.

* While not explicitly stated on the Parachat site, this room name may be case sensitive.

Parachat on your iPhone

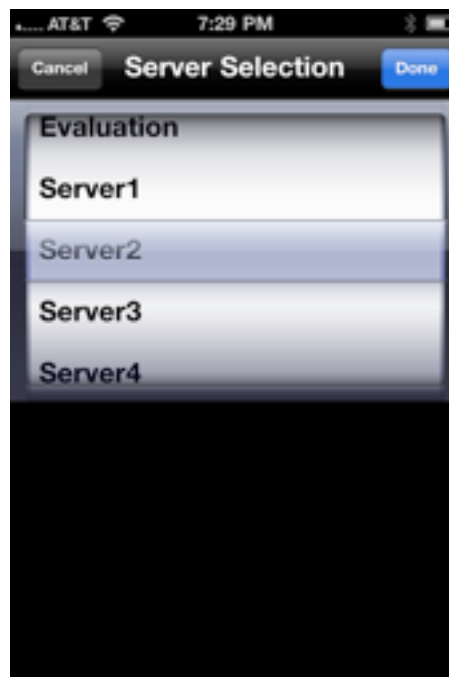

Server Selection...

In the Server Selection screen you will find a list of servers. To access the Table 9 Chat server you need to select Server 2.

Then click the Done Button.

After setting this up you may need to relaunch the application on iOS 4 iPhones (this is because of the multitasking ability).

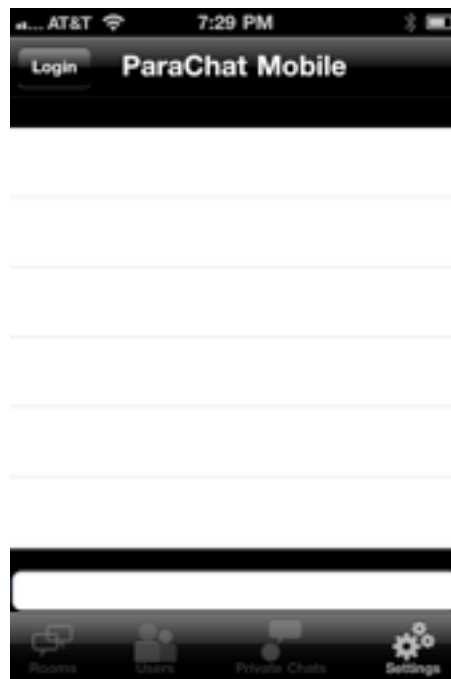

Parachat on your iPhone

Logging In

This is the screen you will see when you start the Parachat application. Once all your settings are in you now just click on the Login Button. You will then log into the room that was set in your preferences.

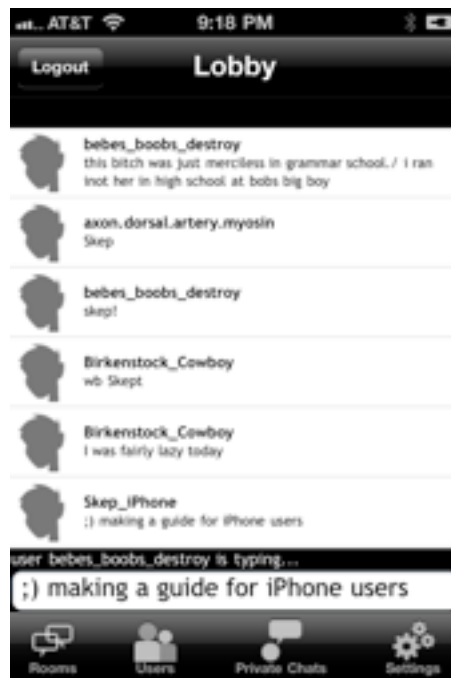

Parachat on your iPhone

Chatting in the Lobby

Once you have logged in you will be presented with the screen where everyone is chatting. (note there is an option to auto-scroll the chat window, this may be hard to keep up with if there are a lot of people chatting, however you need to know which you are using).

Parachat on your iPhone

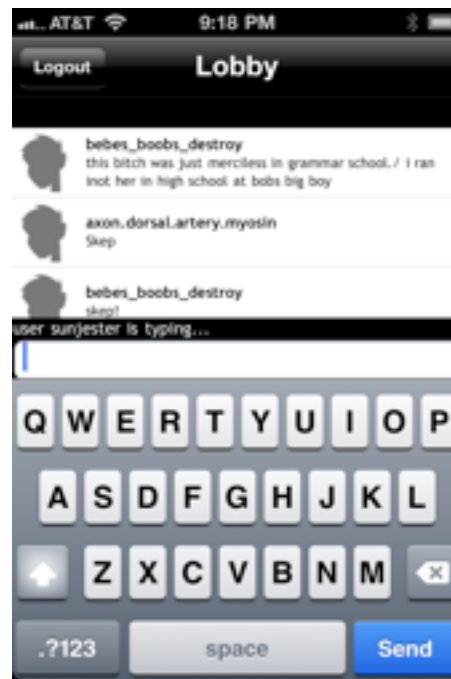

Typing in the Room

Click down in the text window and you will be presented with the iPhone keyboard to enter your message in.

Click "Send" when you are ready to send your message.

Again, auto-scrolling is off by default.

Parachat on your iPhone

Users, Rooms, Private Chat

You can access the User List, Room List, Private Chats once you have logged in.

Enjoy.
